

STRAPPING TOOLS FOR THE 21st CENTURY

Heavy Duty PET/PP Tensioner Model: MUL -320

Breakthrough solution for creating multiple pressure zones greatly enhance seal efficiency;

Staggered jaws allow the tool to be symmetrical, eliminating the need for special tool orientation when sealing;

Cam-action jaws apply larger closing forces on a shorter shoulder, reducing sealing effort and increasing jaw life;

Jaws and anvils are fabricated from top quality heat treated steel;

Unique jaw design requires less clearance between the seal to be closed and the surface of the package;

Designed for use with ORP 2300 or equivalent seals.

Highest performance with all non-metallic strapping - polypropylene and polyester;
Innovative gripping mechanism grips and releases strap with a vertical motion, providing increased holding power and reduced wear;

Heavy-duty cutter reduces force to be applied by the wrist and extends cutter life;

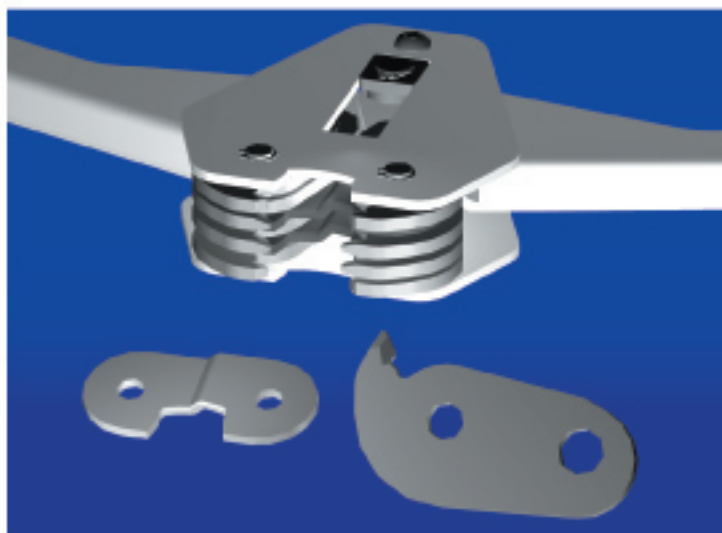

Patented windlass return mechanism makes strap loading a breeze;

Exclusive strapping shield keeps the strap end from interfering with the sealing process;

High quality castings for enhanced durability;

Modern, ergonomic, rugged design with high quality paint.
